  <div class="main-container">
    <div class="Content">
      <div class="text">
        <h2>What is BMI?</h2>
        <p>
          BMI (body mass index) is a measure for adults to check what
          category their height and weight puts them in - underweight,
          healthy, or overweight. The calculator will give you an idea of
          how your weight compares to common values. Body Mass Index (BMI)
          is calculated as your weight divided by the square of your height
          or  $BMI = weight/height^2$ .
        </p>
        <div class="about">
          <div>
            
          </div>
          <div class="right2">
            <h3>BMI weight ranges</h3>
            <p>
              Less than 18.5 = Underweight<br />Between 18.5 - 24.9 =
              Healthy Weight<br />Between 25 - 29.9 = Overweight <br />Over 30 = Obese
            </p>
          </div>
        </div>
        <h2>What your BMI score means</h2>
        <h3>Underweight</h3>
        <p>
          Being underweight might mean you're not getting all the nutrients,
          vitamins, and minerals that your body needs to be healthy. It may
          affect your skin, hair, and teeth or you may feel more tired than
          you should. Women may have irregular periods and have a greater
          chance of osteoporosis. You should speak to your doctor to find
          out why you have a low BMI and about how to gain weight healthily.
        </p>
        <h3>Healthy weight</h3>
        <p>
          Having a BMI score within the healthy weight range is a good sign
          that you are the right weight for your height. But always remember
          that the BMI does not tell you anything about the make-up of your
          body - such as how much muscle or fat you have, how much physical
          activity you do, or your body type. So, keep an eye on your

```

```

        general health, diet, and exercise and track any changes in your
        weight.
    </p>
    <h3>Overweight</h3>
    <p>
        If your BMI is in the overweight range you may be more at risk of
        developing health conditions such as type 2 diabetes, heart
        disease, gallstones and cancer. For help losing weight, read our
        weight loss information leaflet.
    </p>
    <h3>Obeses</h3>
    <p>
        If your BMI score is between 30 to 35 then there is a high chance
        you have class 1 obesity, with a range between 35 and 40 being
        class 2. Your chances of developing health issues associated with
        being overweight can increase if you are obese.

Output:

The image displays two screenshots of a web application titled "BMI Calculator".

Top Screenshot (Home Page):

- Browser:** The address bar shows the URL `127.0.0.1:5501/BMI%20Calculator/Pages/Home/index.html`.
- Navigation:** The top navigation bar includes links for [Home](#), [Calculate](#), [What is BMI?](#), and [Feedback](#).
- Header:** The logo features a hand icon and the text **BMI**.
- Main Content:** The background is a light gray with a hexagonal pattern. On the right, the text reads: "Curious about your Body Mass Index? Check If You're in the **Normal, Overweight, or Underweight** range! Click to find out now." Below this text is a black button labeled **Calculate**.

Bottom Screenshot (Calculate Page):

- Browser:** The address bar shows the URL `127.0.0.1:5501/BMI%20Calculator/Pages/Calculate/calculator.html`.
- Navigation:** The top navigation bar includes links for [Home](#), [Calculate](#) (highlighted in red), [What is BMI?](#), and [Feedback](#).
- Header:** The logo features a hand icon and the text **BMI**.
- Main Content:** The background is a light gray with a grid pattern. On the right, there is a large image of a medical sphygmomanometer. On the left, the text reads: "Calculate Your **BMI** Now!". Below this, there are two sections:
 - Choose Units:** Two dropdown menus: "Height Unit: Centimeters (cm)" and "Weight Unit: Kilograms (kg)".
 - Enter Values:** Two input fields: "Height (cm): Enter height" and "Weight (kgs): Click to Enter".Below these inputs is a black button labeled **Calculate BMI**.

What is BMI?

BMI (body mass index) is a measure for adults to check what category their height and weight puts them in - underweight, healthy, or overweight. The calculator will give you an idea of how your weight compares to common values. Body Mass Index (BMI) is calculated as your weight divided by the square of your height or $BMI = \text{weight} / \text{height}^2$.

BMI weight ranges

Less than 18.5 = Underweight
Between 18.5 - 24.9 = Healthy Weight
Between 25 - 29.9 = Overweight
Over 30 = Obese

What your BMI score means

Underweight

Being underweight might mean you're not getting all the nutrients, vitamins, and minerals that your body needs to be healthy. It may affect your skin, hair, and teeth or you may feel more tired than you should. Women may have irregular periods and have a greater chance of osteoporosis. You should speak to

What your BMI score means

Underweight

Being underweight might mean you're not getting all the nutrients, vitamins, and minerals that your body needs to be healthy. It may affect your skin, hair, and teeth or you may feel more tired than you should. Women may have irregular periods and have a greater chance of osteoporosis. You should speak to your doctor to find out why you have a low BMI and about how to gain weight healthily.

Healthy weight

Having a BMI score within the healthy weight range is a good sign that you are the right weight for your height. But always remember that the BMI does not tell you anything about the make-up of your body - such as how much muscle or fat you have, how much physical activity you do, or your body type. So, keep an eye on your general health, diet, and exercise and track any changes in your weight.

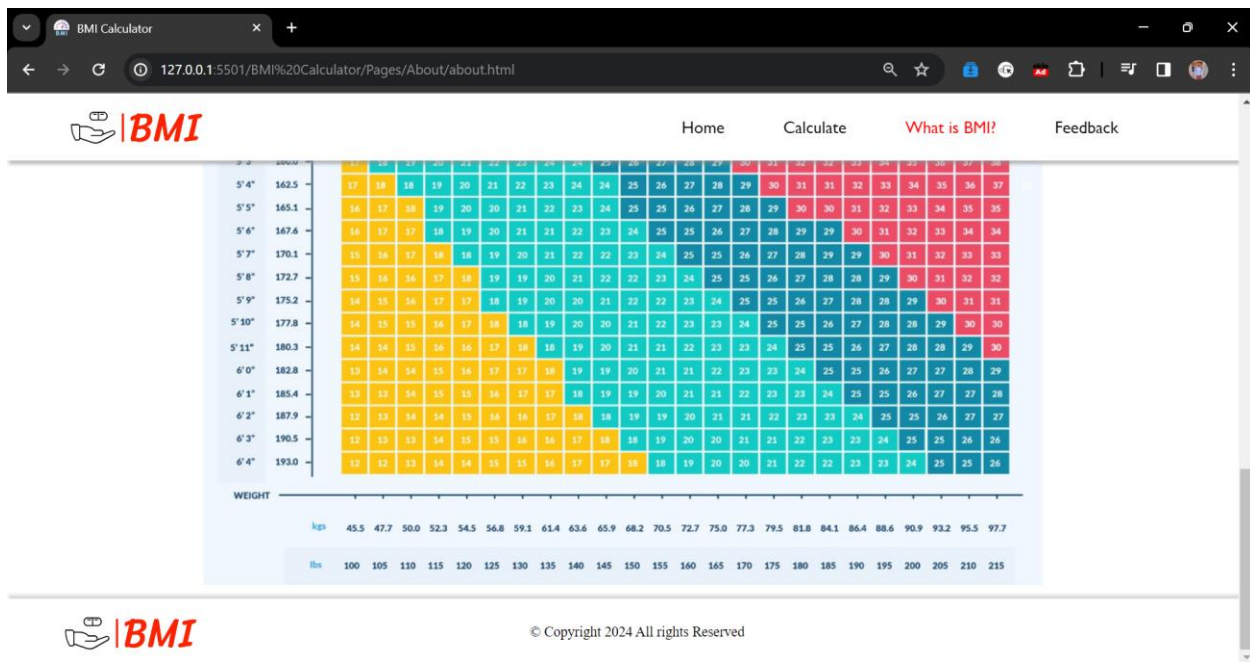

Overweight

If your BMI is in the overweight range you may be more at risk of developing health conditions such as type 2 diabetes, heart disease, gallstones and cancer. For help losing weight, read our weight loss information leaflet.

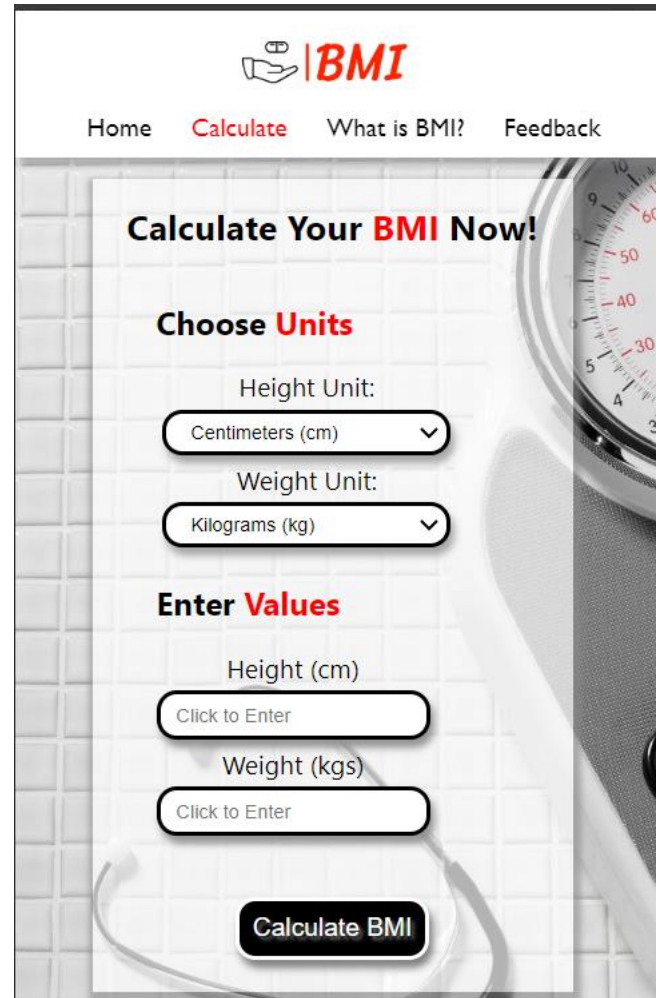

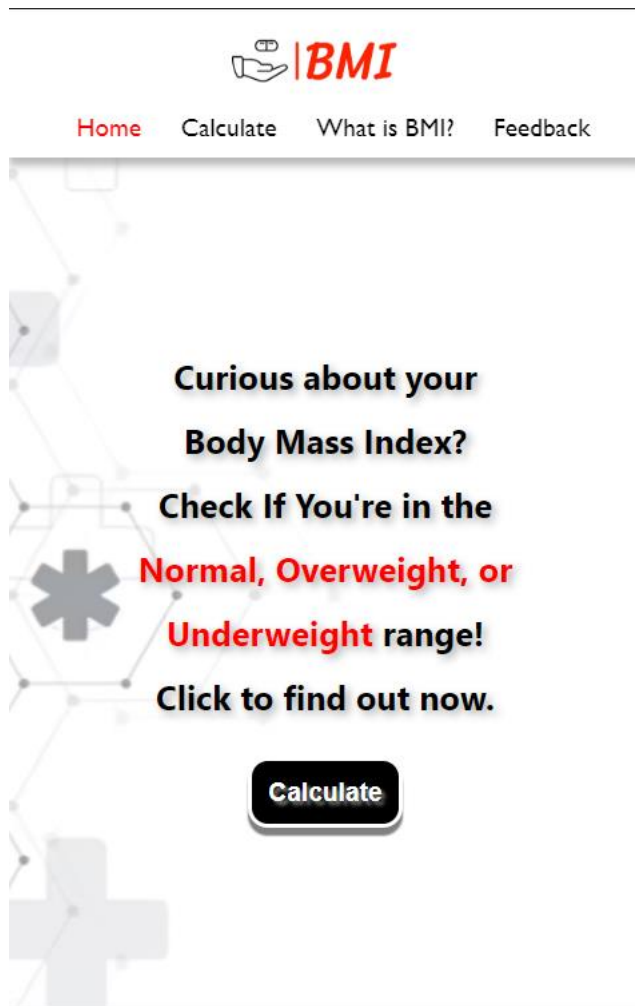

Obese

If your BMI score is between 30 to 35 then there is a high chance you have class 1 obesity, with a range between 35 and 40 being class 2. Your chances of developing health issues associated with being overweight can increase if you are obese.
